DATA SHEET

LONE WORKER PROTECTION

HP SMS Lone Worker Alarm System

The SBES HP SMS Lone Worker System will provide an alarm that can contact other people automatically in the event of an emergency. Help can be summoned in two ways:-

- 1). By pressing the two buttons simultaneously on the alarm unit an immediate Panic alarm will be sent.
- 2). Should the unit become stationary, after 30 seconds an audible alert will begin notifying the user that the alarm unit has entered the warning stage, if the alarm unit is not moved within 30 seconds an automatic Person Down alarm will be sent.

When the control unit receives an alarm signal, the system activates the internal auto dialler notifying up to 10 telephone numbers of an emergency.
