LONE WORKER PROTECTION

Mini LED Lone Worker Alarm System

The SBES Lifesaver Mini LED System is a four user/zone lone worker system that will provide an alarm and contact other people automatically in the event of an emergency.

Help can be summoned in two ways:-

1). By pressing the two buttons simultaneously on either side of the alarm unit an immediate 'Panic' alarm will be sent.

2). Should the unit be tilted more than 45 degrees, after 30 seconds an audible or vibration alert will begin notifying the user that the alarm unit has entered the warning stage, if the alarm unit is not returned to the upright position within 30 seconds an automatic 'Person Down' alarm will be sent.

When the control unit receives an alarm signal, the beacon sounds to alert people in the local area that assistance is required. Simultaneously, the system dials up to 10 telephone numbers alerting the recipients to which lone worker alarm has been activated. Additionally, the control unit indicates which lone worker alarm has been activated.

Technical Data:

L/W Frequency: 868.6625 MHz

Supply voltage: 90-240v AC

Options:

SMS Text Alert Unit

Intrinsically Safe Lone Worker Units
